Job Title

Frontend Developer – Next.js (Fresher)

Job Description

We are looking for a **Fresher Frontend Developer** with hands-on experience in **Next.js and React.js**. The candidate should be comfortable building responsive web applications, integrating APIs, and working with modern frontend tools.

Required Skills

- HTML5, CSS3
- Responsive Web Design
- JavaScript (ES6+)
- React.js
- React Hooks
- Next.js
- Client-Side Rendering (CSR)
- Server-Side Rendering (SSR)
- REST API Integration
- State Management (React Context / basic)
- Git & GitHub
- Debugging and Troubleshooting
- Basic SEO for Web Applications

Good to Have Skills

- TypeScript
- Tailwind CSS / Material UI
- Figma to UI Implementation
- Authentication (JWT – basic understanding)
- Deployment using Vercel / Netlify

Candidate Requirements

- Must have **at least 1–2 frontend projects** built using React.js or Next.js
- GitHub profile with project code is mandatory
- Understanding of API integration and async JavaScript
- Willingness to learn and improve code quality

Experience

- Fresher / 0–1 Year

Notice

Candidates without **practical project experience** or **GitHub repositories** will not be considered.
